

Java Code Reference

A basic Java class with a main method:

```
1 public class Hello {  
2     public static void main(String[] args) {  
3         String message = "Hello, World!";  
4         System.out.println(message);  
5  
6         // Loop example  
7         for (int i = 0; i < 5; i++) {  
8             System.out.println("i = " + i);  
9         }  
10    }  
11 }
```

Inline: use `System.out.println()` to print to stdout.
